Re: Permanent Cap on the San Jacinto Waste Pits

Dear Mr. Miller:

I wanted to add my opinion to the discussion about the cleanup remedy for the San Jacinto Waste Pits. In the interest of all of us near the Superfund site, including down here near Galveston Bay, please make the current cap a permanent one instead of risking catastrophe through a very long removal process.

The temporary cap has not leaked and has not exposed any people to the site's hazardous waste. Science supports a permanent cap over other cleanup options.

Please think about all of us near the Superfund site and keep the contaminants safely where they are.
